

SOFRAME, French defence and technological innovation

SOFRAME designs, produces and supports land based vehicles systems in the defence and security sectors.

The company benefits from a modern and state of the art industrial site which is part of the **LOHR group** situated in Duppigheim in the Alsace region of France.

Our expertise in engineering is based on the **LOHR group's** history of research and development to ensure that we maintain our leading position in our specialist fields of technology thus enabling us to continuously develop our skills in the integration of land combat systems. It is our company's ethos to be at the forefront of innovative projects in the fields of mobility, defence and logistics.

*Combat and security vehicles, Special Forces vehicles,
Command post and support vehicles, transport and recovery systems and
Anti-Riot vehicles.*

SOFRAME awaits you at its outdoor stand

EXT Pe6a / B430

Latest defense and security solutions.

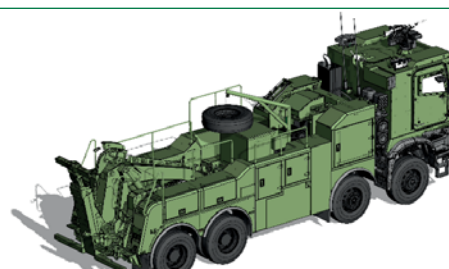

MPGV, Multi Purpose Gendarmerie Vehicle

The **MPGV** is a high-mobility 13-tonne 4x4 armoured vehicle designed for security operations and maintaining peace and order. It is designed to deploy intervention teams in hostile situations and it can transport up to 10 people depending on the version required.

The **MPGV** is now available in several versions and each version can be configured in terms of various fittings and equipment according to the customer's specific needs and requirements.

The version shown includes the 500LR pre-shot sniper detector system by CILAS.

HRV, Heavy Recovery Vehicle

The **HRV** is the latest generation 8x8 heavy recovery carrier.

It is equipped with a pressurized armoured cab and a weapon system which can be controlled remotely.

The **HRV** combines the functions of a heavy duty recovery and towing carrier for the removal of vehicles which have been rendered immobile.

VENPIR and OUTFIELDER, Special Forces vehicles

The VENPIR and OUTFIELDER, two of **SOFRAME** Special Forces vehicles, are high-mobility rapid intervention 4x4 vehicles used to transport crews to the intervention zone rapidly.

The vehicles can be fitted with the latest hardware and communication equipment. In addition a ringmount for 12.7 mm calibre guns and swingmounts for 7.62 mm calibre guns can be fitted.

The VENPIR is 6.2 m long and 2.4 m high with a GVW of 11.5 tonnes. It can carry a crew of 5 people and has a maximum speed of 110 km/h.

The OUTFIELDER is 5.4 m long and 2.2 m high with a GVW of 5.5 tonnes. It can carry a crew of 3 people and has a maximum speed of 120 km/h.

SOFRAME dedicated fleet management

SOFRAME offers support for ground forces with a dedicated fleet management solution:

This turnkey solution guarantees the following:

- real-time monitoring of the performances of a vehicle fleet
- availability of vehicles configured to exact needs and specifications.
- reduction in equipment running costs with optimised maintenance thus guaranteeing uptime.
- control of JIT - just-in-time supply chain,
- anticipation of potential problems thus allowing alternative planning.

SOFRAME dedicated fleet management system is based on the digitalisation of maintenance and logistics schedules to optimise operational and budget efficiency.

Come and visit the SOFRAME stand to discover your new defence solutions.
