Technical characteristics

At **Soframe**, we are constantly seeking to improve in order to design vehicles at the cutting edge of technology.

We exchange ideas with our customers and suppliers to offer ever **more efficient solutions** at the right price. The development emphasises the robustness, resilience, operational efficiency, protection of the crew and maintenance and operating costs.

The New VID MF is the **latest version** of the VID range marketed since 1994 notably in service with the police in Paris. It is the upgrade of the VID 12 000 S, of which 150 vehicles entered into service between 2018 and 2021.

The New VID MF also has a **360° self-protection system**, a water tank ranging from 7000 to 10,000 litres and auxiliary tanks for several types of additives which can be selected during the mission.

The **modernisation** proposed is underpinned by the optimised cost of ownership of the vehicle over a life time of several decades. In this respect, we implement the **latest technologies** in terms of systems management, electronic controls, communications and armoured protection for **maximum efficiency**.

10 000 l

Max speed: 90 km/h

GVWR: 29 t

Range: 500 km

Cannon : 2

- Range: 60 m
- Capacity: 10,000 l of water + additives (option)
- Water pressure: 15 bar (adjustable)

7 000 l

Max speed: 90 km/h

GVWR: 21 t

Range: 600 km

Cannon : 1

- Range: 60 m
- Capacity: 7000 l of water + additives (option)
- Water pressure: 15 bar (adjustable)

The independence of the functions enables the crew to deploy all the available functions simultaneously.
